*Fertilizer Research* **32:** 351–352, 1992

# Index to Volume 32

Freney, J.R., Smith, C.J. and Mosier, A.R.: Effect of a new nitrification inhibitor (wax coated calcium carbide) on transformations and recovery of fertilizer nitrogen by irrigated wheat 1
Bhatti, M.E.: Physical properties comparative study of urea of different companies in Pakistan 13
Malhi, S.S. and Nyborg, M.: Recovery of nitrogen by spring barley from ammonium nitrate, urea and sulphur-coated urea as affected by time and method of application 19
Bolland, M.D.A.: The phosphorus requirement of different crop species compared with wheat on lateritic soils 27
Ziegler, K., Nemeth, K. and Mengel, K.: Relationship between electroultrafiltration (EUF) extractable nitrogen, grain yield, and optimum nitrogen fertilizer rates for winter wheat 37
Luchinat, C., Capozzi, F., Antisari, L.V., Ciavatta, C. and Sequi, P.: Evaluation of systematic exploitation of tolerance with respect to a declared nutrient content in the production of fertilizers 45
Norman, R.J., Helms, R.S. and Wells, B.R.: Influence of delaying flood and preflood nitrogen application on dry-seeded rice 55
Van Erp, P.J. and Van Dijk, T.A.: Fertilizer value of pig slurries processed by the Promest procedure 61
Huettl, R.F. and Hunter, I.: Nutrient management of forests under stress for improved health and increased productivity 71
Hassan, Z.A., Young, S.D., Hepburn, C. and Arizal, R.: Urea-rubber matrices as slow-release fertilizers. II. Efficacy under flooded rice conditions 83
Robinson, J.S., Syers, J.K. and Bolan, N.S.: Influence of calcium carbonate on the dissolution of Sechura phosphate rock in soils 91
Ruter, J.M.: Influence of source, rate, and method of applicating controlled release fertilizer on nutrient release and growth of 'Savannah' holly 101
Mann, H.C., Culp, J.E. and Johnson, F.J.: TVA'S fertilizer/pesticide containment program 107
Perry, W.E.: The utilization of by-products and waste products in the production of commercial fertilizers 111
Tennakone, K. and Weragama, U.T.: Nitric acid treated phosphate fertilizer from Eppawala apatite in Sri Lanka 115
*Short communication*
Bolland, M.D.A.: Effect of sampling depth on bicarbonate soil phosphorus test values 121
Cekinski, E. and Thomassin, J.H.: Superphosphates from Brazilian phosphate concentrates *Distribution of $P_2O_5$ in the products* 125
Dhillon, S.K. and Dhillon, K.S.: KInetics of release of potassium by sodium tetraphenyl boron from some top soil samples of Red (Alfisols), Black (Vertisols) and Alluvial (Inceptisols and Entisols) soils of India 135
Savant, N.K., Ongkingco, P.S., Garcia, F.D., Dhane, S.S., Khadse, R.R., Chavan, S.A. and Rao, K.S.: Agronomic performance of urea briquette applicator in transplanted rice 139
Ntare, B.R. and Bationo, A.: Effects of phosphorus on yield of cowpea cultivars intercropped with pearl millet on Psammentic paleustalf in Niger 143
Kipp, J.A.: Thirty years fertilization and irrigation in Dutch apple orchards: a review 149
Frazier, A.W.: The phase system $CaO–CO(NH_2)_2–N_2O_5–H_2O$ at 25°C 157
Frazier, A.W. and Waerstad, K.R.: Crystallography and equilibrium solubility for ammonium and potassium orthophosphites and hypophosphites 161
Bolland, M.D.A., Glencross, R.N., Gilkes, R.J. and Kumar, V.: Agronomic effectiveness of partially acidulated rock phosphate and fused calcium-magnesium phosphate compared with superphosphate 169
Mendoza, R.E.: Phosphorus effectiveness in fertilized soils evaluated by chemical solutions and residual value for wheat growth 185
Kumar, V., Gilkes, R.J. and Bolland, M.D.A.: The residual value of rock phosphate and superphosphate from field sites assessed by glasshouse bioassay using three plant species with different external P requirements 195

Gooding, M.J. and Davies, W.P.: Foliar urea fertilization of cereals: a review 209
Benbi, D.K. and Brar, S.P.S.: The interpretation of Olsen extractable P values in relation to recommendations for the fertilizer requirements of crops 223
Sandhu, K.S., Benbi, D.K., Prihar, S.S. and Saggar, S.: Dryland wheat yield dependence on rainfall, applied N and mulching in preceding maize 229
Sullivan, J.M., Grinstead, J.H., Jr., and Kohler, J.J.: Nitric acid acidulation of phosphate rock and pyrolysis of acidulate to produce phosphatic and nitrogen fertilizers 239
Michalk, D.L. and Zhi-Kai, H.: Response of subterranean clover (*Trifolium subterraneum*) to lime, magnesium, and boron on acid infertile soil in subtropical China 249
Turner, J., Lambert, M.J., Bowman, V. and Knott, J.: Two post thinning fertilizer trials in *Pinus radiata* in New South Wales, Australia 259
Otabbong, E. and Persson, J.: Relative agronomic merit of fused calcium phosphate. II. *Dry matter production and P yields of ryegrass* (Lolium perenne *L.*) *and barley* (Hordeum vulgare *L.*) *in pot experiments* 269
Yadav, V.B. and D'Souza, T.J.: Tranformations of ortho- and pyrophosphates with or without zinc in chemical solutions and major Indian soils 279
Rajan, S.S.S., Brown, M.W., Boyes, M.K. and Upsdell, M.P.: Extractable phosphorus to predict agronomic effectiveness of ground and unground phosphate rocks 291
Sharma, K.L., Bajaj, J.C., Das, S.K., Bhaskara Rao, U.M. and Ramalingaswami, K.: Nutrient transformation in soil due to addition of organic manure and growing crops. I. *Nitrogen* 303
Sharma, K.L., Bajaj, J.C., Das, S.K., Bhaskara Rao, U.M. and Rattan, R.K.: Nutrient transformation in soil due to addition of organic manure and growing crops. II. *Zinc* 313
Malhi, S.S., Nyborg, M. and Heaney, D.J.: Potential for nitrogen mineralization in central Alberta soils 321
Patra, D.D., Anwar, M., Chand, S. and Singh, D.V.: Fate of fertilizer $^{15}N$ applied as urea and ammonium sulphate in opium poppy (*Papaver somniferum* L.) grown under greenhouse conditions 327
Posner, J.L. and Crawford, E.W.: Improving fertilizer recommendations for subsistance farmers in West Africa: The use of agro-economic analysis of on-farm trials 333
Braithwaite, A.C., Eaton, A.C. and Groom, P.S.: Chemical effects in the assessment of phosphate rock residues extracted from multicomponent fertilizers 343

*Fertilizer Research* **32:** 353, 1992
